Location

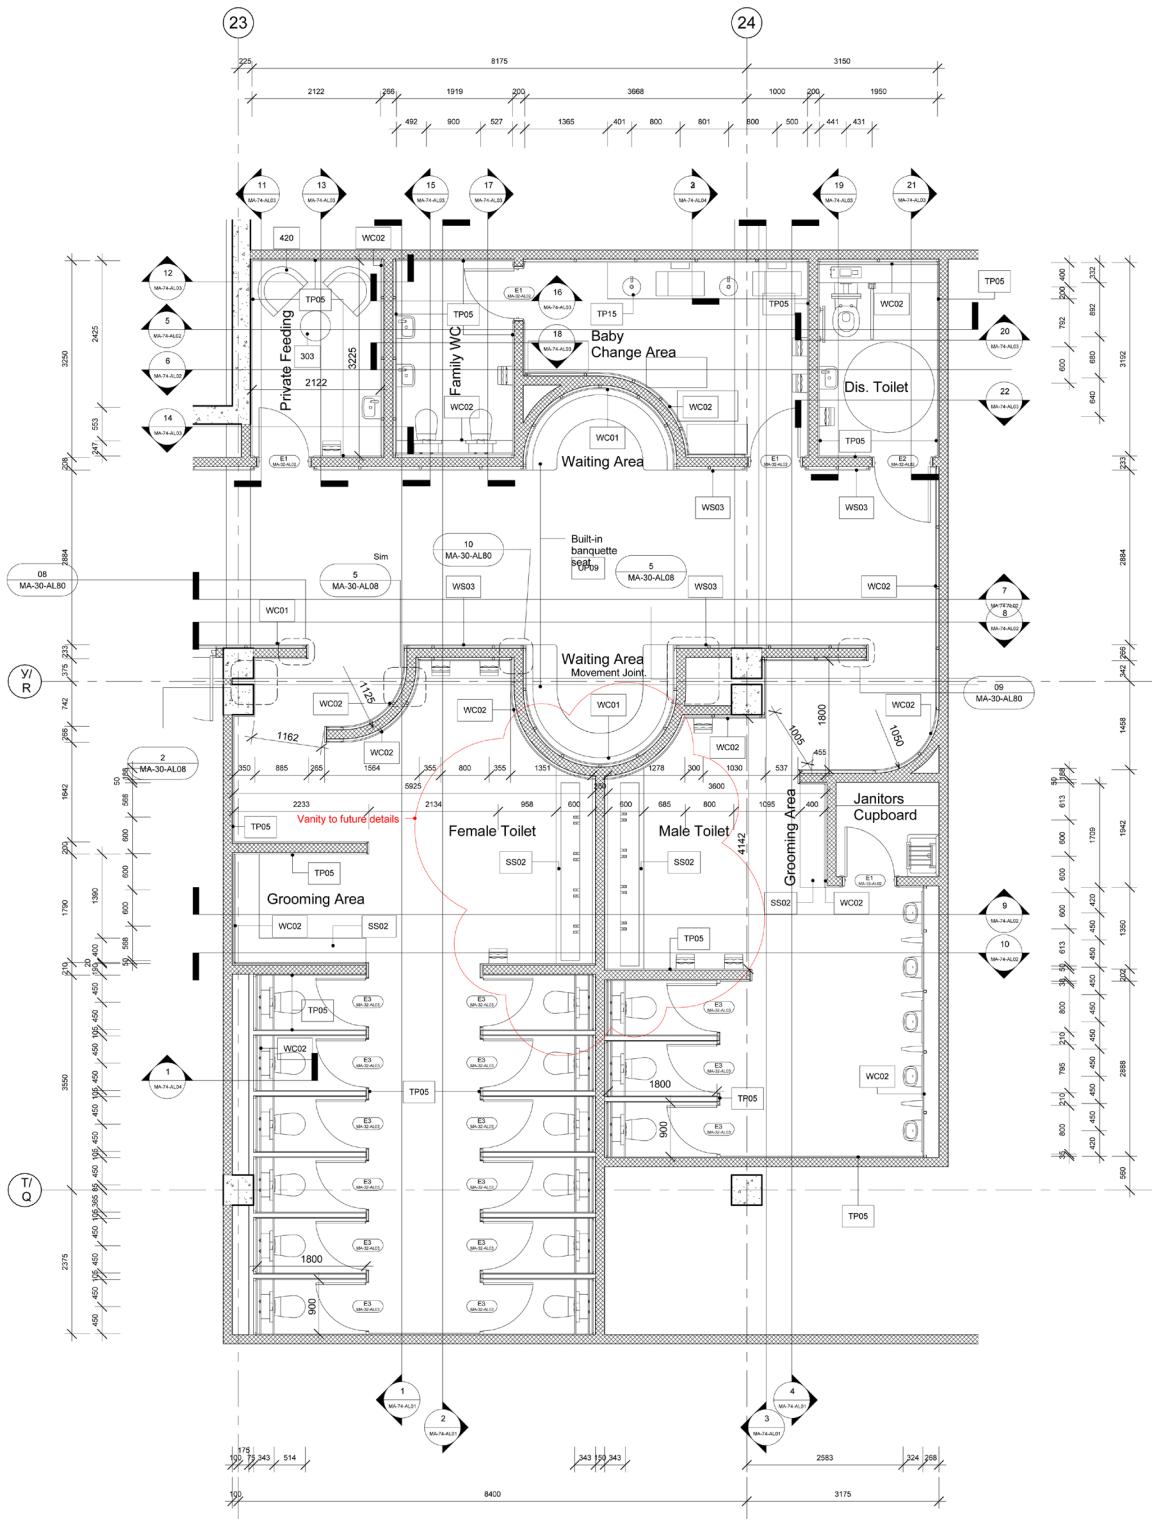

A large shopping centre outside Moscow with good transport connections and a vibrant retail/leisure environment. Joined a large multidisciplinary team communicating through Revit (BIM). Focusing on the centre's restroom provision I produced a detailed design package outlining the specification and layout of each restroom. Included were family and accessible facilities as well as children's play areas and baby change facilities. Drawings included plans, RCPs, internal elevations and detailed sections. Detailed to a high standard, the package I produced was received well.
