*Site Aerial Location Plan*

A canalside residential development for Milton Keynes. Consisting of approximately 383 residential units with a mix of 87% apartments and 13% houses. With an emphasis on creating a balanced community, affordable housing will be provided onsite with accommodations for

a civic square and community support facilities. My focus was on the canalside housing, producing plans, elevations, sections and visuals for the planning application.

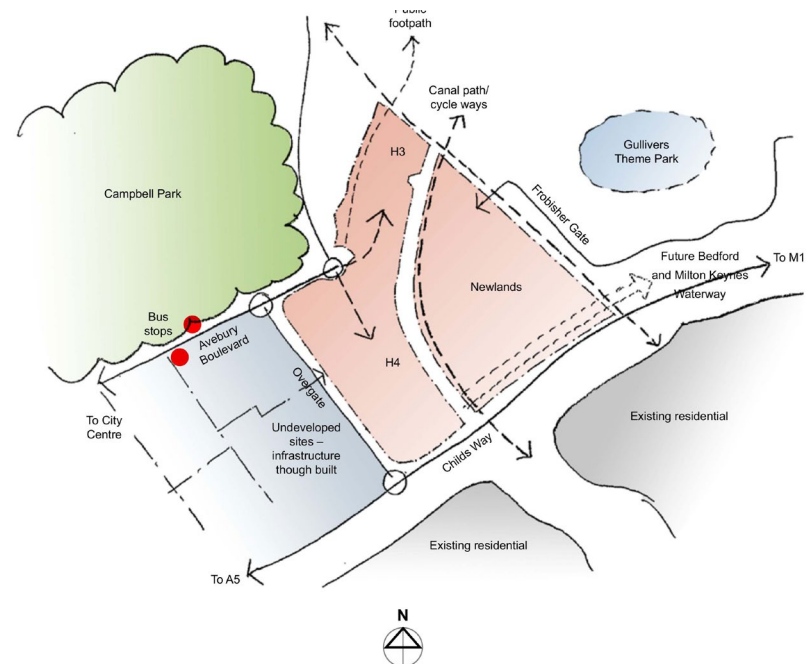

Masterplan

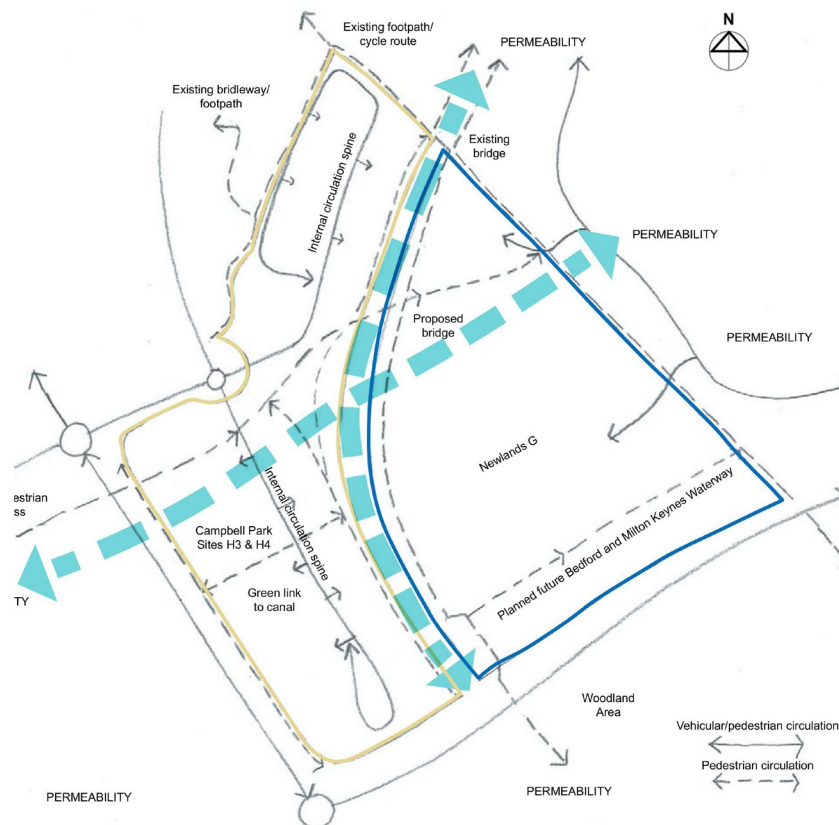

### Site Access Plan

## Site Movement Analysis Plan

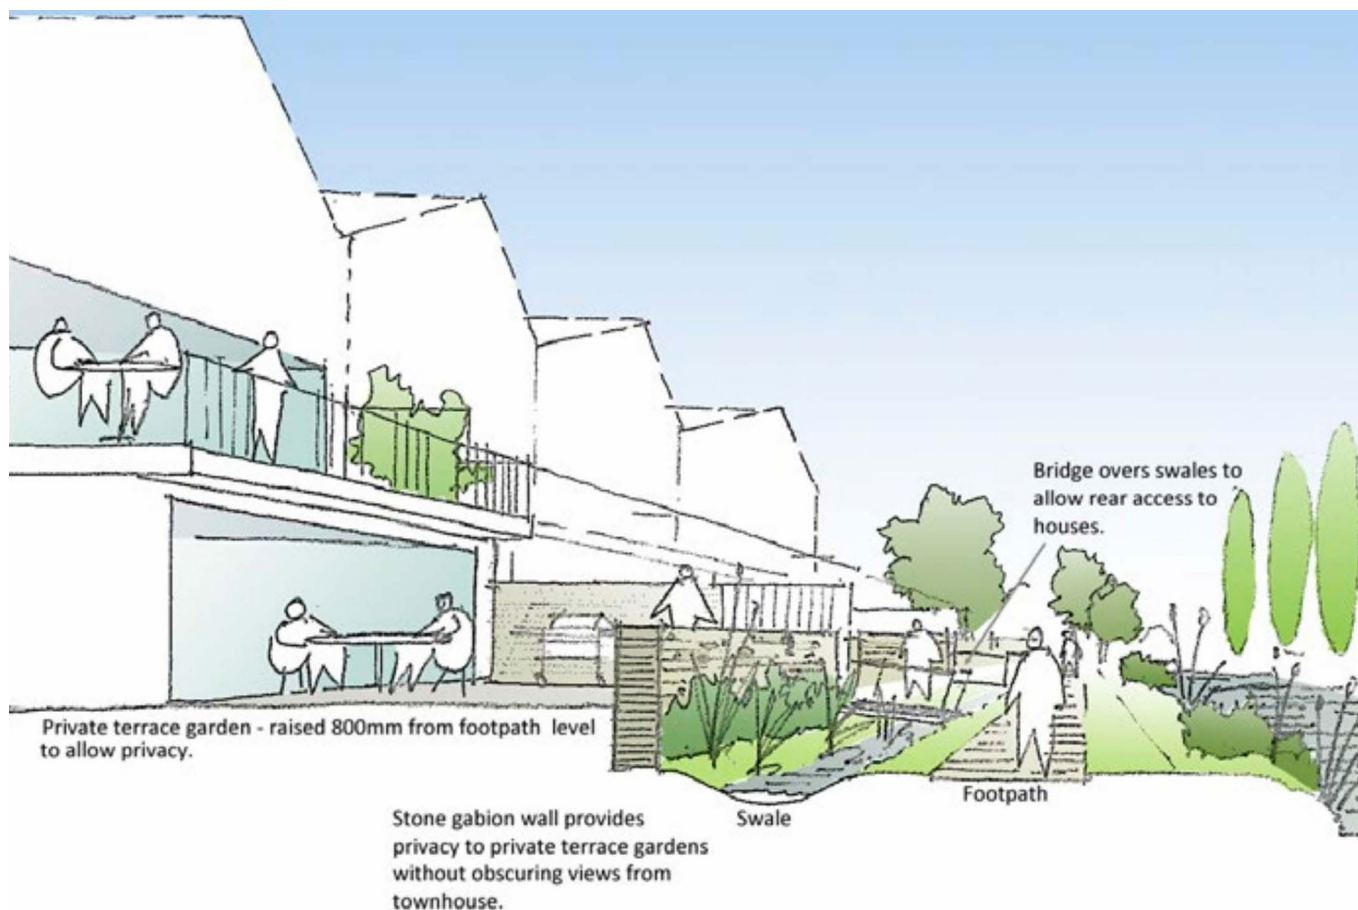

## Public Realm Location Plan

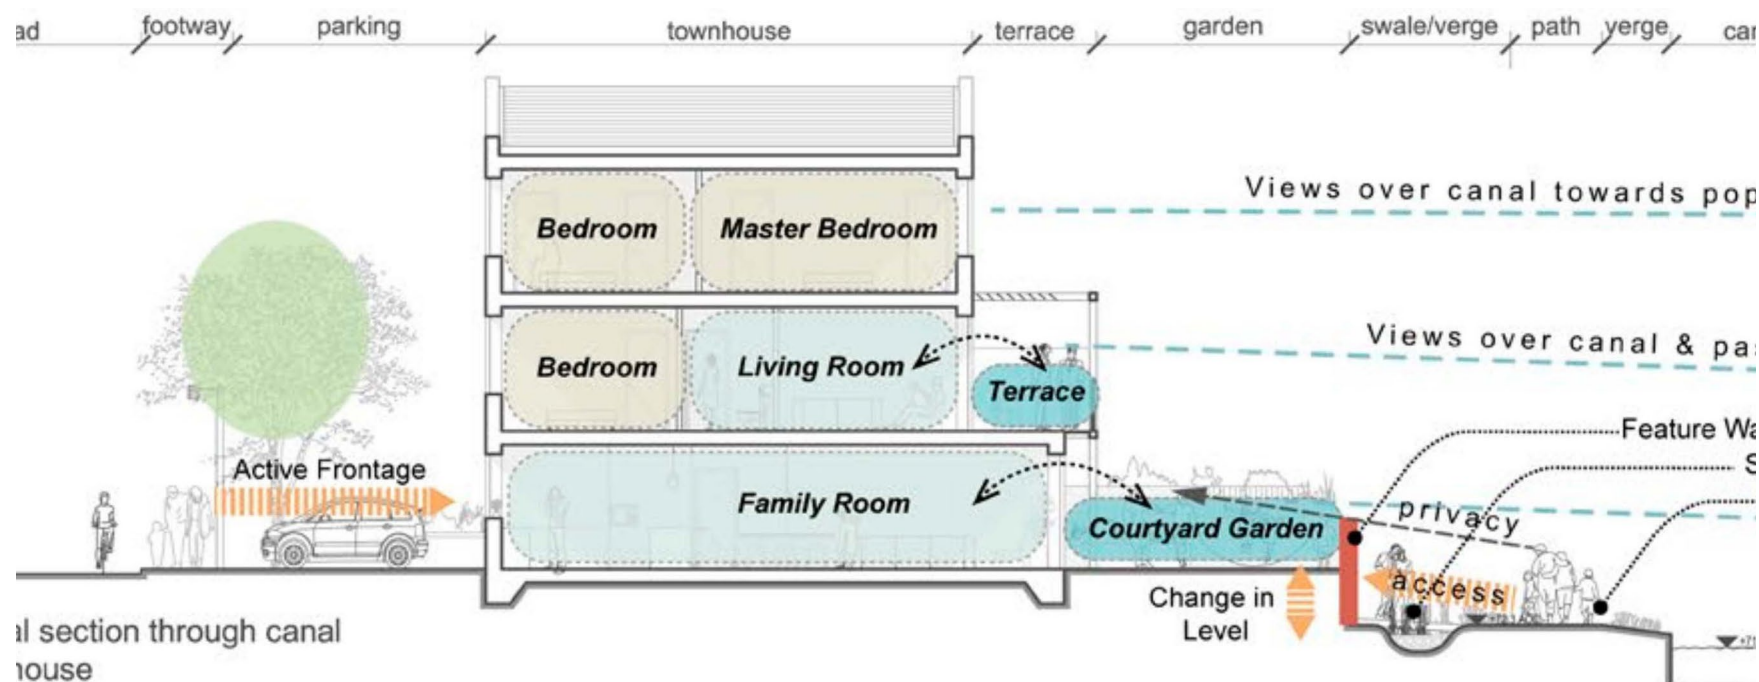

## Pedestrian Permeability Plan

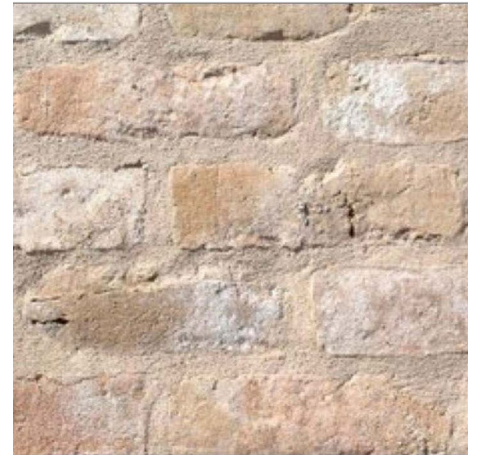

*Proposed Canalside View*

*Typical Canalside House, Site Section*
